

Reference to certified status and use of marks

[IVDR] In the case of conformity assessment under the IVDR, NoBoMed shall not apply a certification mark, but shall verify the correct application of the CE marking in accordance with Article 18 and Annex V of the IVDR, together with the corresponding indication of the four-digit identification number of the notified body following the CE marking. **[/IVDR]**

[ISO] The requirements for the use of the certification body's own mark shall be specified in a contract. Accordingly, the use of any misleading marking is prohibited. It cannot be used to mark a product. Only logos containing an identification number and provided by the certification body may be used.

RH enters into a legally enforceable agreement for the use of the marks (a contract for certification activities). The contract requires that the certified customer:

- meet the RH requirements including legal requirements, when referring to its certified status in any media, such as the internet, brochures, advertisements or other documents; not to make or permit any misleading statements about its certified status;
- not to use or to permit the use of the certification document or any part of it in a misleading manner;
- if certification is withdrawn, remove the reference to certification in any advertisement that contained it, following the instructions of the RH (see section 9.6.5);
- modify any advertising material if the scope of certification has been narrowed;
- not to allow the use of any reference to the certification of its management system that could give the appearance that the RH has certified a product (including service) or a process;
- not to give the impression that certification covers activities and sites that are in fact outside the scope of certification;
- not to use certification in a way that could damage the reputation of the RH and/or the certification scheme and undermine public confidence. **[/ISO]**
